SECTI	ON 4 FIRST AID MEASURE	S
4.1	Description of first aid measures:	
	General notes:	If symptoms persist, seek medical attention. Show this safety data sheet to the doctor in attendance.
	Following inhalation:	Remove to fresh air. Keep at rest. If not breathing give artificial respiration. Seek medical attention if symptoms occur.
	Following skin contact:	Flush with water, use soap if available. Take off contaminated clothing and wash before re-use. Seek medical attention if irritation persists.
	Following eye contact:	Flush eyes with large amounts of water for at least 10 minutes. Check for and remove any contact lenses if easy to do. Continue rinsing. Seek medical attention if irritation persists.
	Following ingestion:	Do NOT induce vomiting. Never give anything by mouth to an unconscious person. Rinse mouth thoroughly. Seek medical attention if symptoms occur.
	Self-protection of the first aider:	No action shall be taken involving any personal risk or without suitable training. If it is suspected that the mixture is still present, wear appropriate personal protective equipment.

- **4.2 Most important symptoms, both acute and delayed:** Irritation to eyes. No delayed effects known.
- **4.3** Indication of any immediate medical attention and special treatment needed: None known.

5.1	Extinguishing media:	
	Suitable extinguishing media:	Carbon dioxide, foam, dry chemical, water fog or spray.
	Unsuitable extinguishing media:	Do not use water jet.
5.2	Special hazards arising from the	Evacuate immediate area. Shut off 'fuel' to
	substance or mixture:	fire. If possible, keep unaffected containers cool with water spray.
	Hazardous combustion products:	Smoke, soot and oxides of carbon. Burning vapour may give off toxic fumes.

SECTI	ON 6 ACCIDENTAL RELEA	SE MEASURES

Suitable protective equipment (see Section 8) should be worn to prevent any contamination of skin, eyes and personal clothing. For non-emergency personnel: Remove ignition source. Avoid breathing vapours, mist or gas. Ensure adequate

For emergency responders:

ventilation. Keep unnecessary people at a safe distance. Remove ignition source. Avoid breathing vapours, mist or gas. Ensure adequate ventilation.

# 6.2 Environmental precautions:

Prevent liquid from entering drains, sewers and watercourses. Notify the Environment Agency or water authorities if a major spillage occurs. Prevent product from contaminating soil.

# 6.3 Methods and material for containment and cleaning up:

Ventilate well. Eliminate sources of ignition. Take measures to prevent the build-up of electrostatic charge. For contain spillage, and then collect with nor

Contain spillage, and then collect with noncombustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite). Place in a UN approved container for disposal.

Large spills should be pumped (using an earthed explosion proof pump) into UN approved containers pending disposal. Dispose of waste according to local/national regulations.

Rinse site with copious amounts of water, which should not be allowed into drains, sewers or watercourses. No other information.

SECTION	N 7 HANDLING & STORAGE	
7.1	Precautions for safer handling: Protective Measures:	Wear suitable protective clothing such as chemical resistant gloves, apron and goggles/face mask to protect from splashes. Avoid contact with skin and eyes. Do not breathe product spray or mist. Ensure adequate exhaust ventilation when in use.
	Measures to prevent fire:	Keep away from sources of ignition - no smoking. Take measures to prevent the build-up of electrostatic charge.
	Advice on general occupational hygiene:	Wash thoroughly after handling.
7.2	Conditions for safe storage, including any	/ incompatibilities:
	Technical measures and storage conditions:	Store in a cool dry area away from heat and sources of ignition. Keep containers tightly closed when not in use.
	Packaging materials:	Store in original container.
	Requirements for storage rooms and vessels:	Recommended storage temperature 10 °C to 30 °C. Keep containers out of direct sunlight.
7.3	Further information on storage conditions: Specific end use(s):	Rotate stock and check regularly for damaged items.
1.0	Recommendations:	Use only for Non Destructive Testing (NDT) applications.
	Industrial sector specific solutions:	See product data sheet for further information.

**Note:** The Derived No Effect Level (DNEL) is an estimated safe level of exposure that is derived from toxicity data in accordance with specific guidance within the European REACH regulation. The DNEL may differ from an Occupational Exposure Limit (OEL) for the same chemical. OELs may be recommended by an individual company, a government regulatory body or an expert organization, such as the Scientific Committee for Occupational Exposure Limits (SCOEL) or the American

Conference of Governmental Industrial Hygenists (ACGIH). OELs are considered to be safe exposure levels for a typical worker in an occupational setting for an 8-hour work shift, 40 hour work week, as a time weighted average (TWA) or a 15 minute short-term exposure limit (STEL). While also considered to be protective of health, OELs are derived by a process different from that of REACH.

### 8.2 Exposure controls:

Concentrations of product vapours and mists in the working atmosphere must be kept as low as is reasonably practicable. Exposure should be minimised by the use of appropriate containment, engineering control and ventilation measures. Where this is not possible, personal protective equipment should be worn as indicated below where appropriate.

ient should be worn as indicated below where app	propriate.
Appropriate engineering controls:	Provide adequate ventilation, including appropriate local extraction, to ensure that the defined occupational exposure limits are not exceeded. Provide eye wash station. If ventilation is insufficient suitable respiratory protection must be provided.
Personal protection equipment:	
Eye and face protection:	Safety glasses with side-shields conforming to EN166.
Skin protection - hand:	<ul> <li>Protective gloves conforming to EN374-3.</li> <li>Use chemical resistant gloves recommended by glove manufacturer as being suitable for isopropyl alcohol, if hand exposure is unavoidable. Protective gloves made of Butyl or Nitrile are suitable although other types may be more suitable in other circumstances.</li> <li>For prolonged exposure, recommended gloves with protective index 6, &gt;480 minutes permeation time according to EN374.</li> <li>As the product is a preparation, consult the glove manufacturer for exact breakthrough time. Glove manufacturer's</li> </ul>
Skin protection – other:	directions for use should be observed. Wear impervious, flame retardant antistatic protective clothing. The type of protective equipment must be selected according to the concentration and amount of dangerous substance at the specific workplace.

**Respiratory protection:** 

Use a respirator with approriate canister type filter cartridge if spraying in confined or unventilated areas. Respirator Type AX (EN371). For higher level protection use type ABEK-P3 (EU EN 143) respirator cartridges. Use respirators and components tested and approved under CEN standards. Not applicable.

Thermal hazards:

Environmental exposure controls:

Avoid any release to the environment.

# SECTION 11 TOXICOLOGICAL INFORMATION

**11.1** Information on toxicological effects: based on data for component materials.

Acute toxicity - oral:	Based on the available data, the classification criteria are not met.
Acute toxicity – dermal:	Based on the available data, the classification criteria are not met.
Acute toxicity – inhalation:	Based on the available data, the classification criteria are not met.
Skin corrosion/irritation:	EUH066: Repeated exposure may cause skin dryness and cracking
Serious eye damage/irritation:	Eye Irrit. 2 H319: Causes serious eye irritation
Respiratory sensitisation:	Based on the available data, the classification criteria are not met.
Skin sensitisation:	Based on the available data, the classification criteria are not met.
Germ cell mutagenicity:	Based on the available data, the classification criteria are not met.
Carcinogencity:	Based on the available data, the classification criteria are not met.
Reproductive toxicity:	Based on the available data, the classification criteria are not met.
STOT single exposure:	STOT SE3 H336: May cause drowsiness or dizziness.
STOT repeated exposure:	Route of exposure: Inhalation and oral Based on the available data, the classification criteria are not met.
Aspiration hazard:	Based on the available data, the classification criteria are not met.
Information on likely Routes of Exposu	
Inhalation:	Vapour concentrations above the recommended exposure levels are irritating to the eyes and respiratory tract, may cause headaches and dizziness, are anaesthetic and may have other central nervous system effects.
Ingestion:	Ingestion may cause irritation of the mouth, throat and digestive tract. Absorption of large amounts may cause systemic effects.
Eye contact:	This mixture is classified as an eye irritant.
Skin contact:	Frequent or prolonged contact with the product may produce irritation and/or skin dryness and cracking. Product will have a defatting effect on the skin.

Toxicity Test Results: based on data for component materials, where available.
